

Department of Electronics and Telecommunication Engineering

Value Added Courses

Second Year

Title: Workshop on IOT & Android App Development

Objectives:

1. Acquaint participants with the basics of IOT and its application areas.
2. Impart knowledge on the advanced components and different concepts that will be helpful to build real time applications.
3. Basic mini projects simulation.
3. Enable participant to convert their product idea into a working prototype.
4. Bring-up participant to new innovation in the field of electronics.

Contents:

- Basics of IOT
- Environment Setup
- Basic Commands
- Simulation of various projects.
